Discover a new feeling of home: high quality timber internal doors

Our home is the centre of our life, our safe haven, our oasis of well-being.

As a family business, this spurs us on to provide products made in Germany to give you that special feeling of being at home. Our high quality timber internal doors contribute to this and provide your home with that extra cosy feeling.

Whether classic or modern, white lacquer or beech, with glass elements or stainless steel embellishments – Hörmann offers you the timber internal door that suits you and your furnishings perfectly.

Made in Germany

Good reasons for a timber internal door from Hörmann

1

Door leaf and frame versions

With a timber internal door from Hörmann, you are literally choosing a “door for life.” Our uncompromising quality assurance guarantees you a product with a long service life. See for yourself the many advantages of our high quality timber internal doors and discover the various door and frame versions as well as the different surfaces available on the next pages.

Custom combinations:

A rebated door leaf with rounded edges and a frame with rounded edges create a harmonious Softline look **1**. The same combination with angular edges results in clear lines (no image). The flush-closing door leaf and a frame with angular edges give your door a practically flush-fitting appearance **2**.

High quality door leaf

Available with four different door leaf inserts – from a simple honeycomb insert up to a high-quality solid chipboard.

Sturdy timber frame:

Consists of an extra sturdy 25-mm-thick jamb lining. Particularly robust MDF boards give the decorative edges and rebate cladding a smooth surface.

Robust steel frame:

An alternative to the timber frame: the robust steel frame **3**. Thanks to a special final coating, the colour surface is particularly resistant.

2

Extremely impact-resistant: Duradecor surface

The high quality surface will delight you: Duradecor captivates due to features such as heat resistance, robustness and impact resistance, which combine to ensure a long service life.

3

See and touch: Duradecor texture

The finely textured surfaces allow you to feel what you see. A wood grain texture is embossed into the door leaf, making the characteristic wood structure of the Duradecor texture surface tangible. In the synchronous texture, the wood grain matches the printed surface finish exactly.

4

High-class and smooth:
painted surface finishes

Timber internal doors with white painted surfaces have an especially classic and high-quality effect. The Hörmann paint coating on a white base plate ensures a uniform surface with a rich, vibrant colour.

5

All natural:
real wood veneer

Hörmann real wood veneers are produced from high-quality real timber and are truly unique. An environmentally-friendly protective paint ensures that you can enjoy your real wood door for a long time.

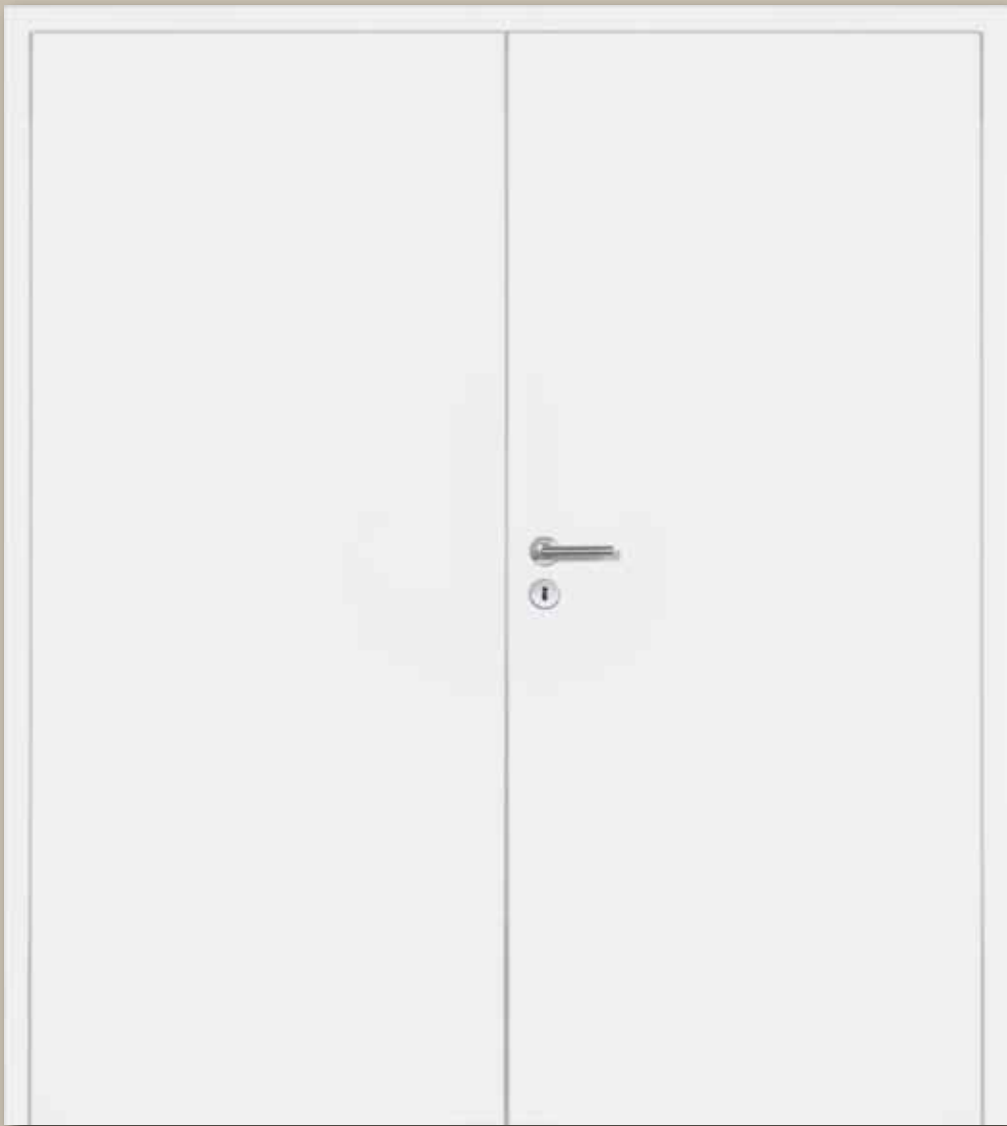

Plain, chic, timeless: BaseLine

Would you like a timelessly elegant internal door with a welcoming character for your home? Then the door models in the BaseLine series offer you the perfect selection. The solid door leaf in a flush or rebated version – combined with your preferred surface – harmonises wonderfully with your style. This allows you to create a comfortable and relaxing atmosphere.

We are dedicated to detail

Subtle embellishments transform your timber internal door into a stylish eye-catcher and satisfy the highest design demands.

For the style Plain 27-7, embellishments with a brushed matt stainless steel look are inlaid flush-fitting in the door leaf, creating an elegant contrast.

Surface-mounted embellishments in stainless steel on the door leaf give the Steel styles timelessly elegant contours that fascinate design fans.

The Steel styles and the style Plain 27-7 are available in all decors of the extremely impact-resistant Duradecor* surface.

Harmonious combinations

A small detail with a major effect: the inlaid pilaster strips in Maple or Beech are the highlight of the door style Inlay 26. They fit flush to the door leaf, resulting in a harmonious overall view. The styles Inlay 2 and Inlay 12 in alternating grain patterns provide the door leaf with a unique look. All Inlay styles are available in the real wood veneers Maple, Beech and White Oak.

The icing on the cake

Recessed grooves are the special feature of the Groove door styles. They are painstakingly milled in the door leaf and then coated with high-quality paint. This results in elegant door styles with white surfaces that are a highlight in any room.

The door leaf version with rounded edges showcases the grooves in a particularly elegant manner.

High-quality details, elegant appearance

For the perfect country look, we recommend the exclusive Georgia door styles. The high-quality profile strip is inlaid into grooves in the door frame using traditional carpentry techniques, lending these styles an elegant appearance. The Georgia door styles are available in all Duradecor*, real wood veneer and lacquer surfaces.

Decorative contrast for more cosiness

The Vermont door styles radiate classic elegance. They are characterised by a profile strip that is surface-mounted on the smooth door leaf, creating a comfortable contrast. These door styles are available in all Duradecor* designs.

Beauty that is more than skin deep

The Carolina doors have a clean, classic look. The panel frames are created by an embossed profile in the door leaf. A paint coating on a white base plate gives the styles a smooth, brilliant colour surface.

A feeling of security for you and your family

Almost all BaseLine and DesignLine styles are available as apartment entrance doors, and as TechnicLine styles with specialised equipment (e.g. LCD display). The doors are equipped with climatic class 3 and acoustic rating category II as standard. This way, they offer protection against noise and cold from outside. Optionally, all doors from the TechnicLine are available with RC 2 security equipment and other special features – for a feeling of complete safety when you go to bed at night.

Your safe apartment entrance door

TechnicLine is available without glazing cut-out in BaseLine and the following versions of DesignLine: Steel, Plain, Groove, Inlay, Georgia (with contour-milled profile strip) and Vermont.

Standard equipment

- Climatic class 3
- Acoustic rating category II

Retractable bottom seal as standard

Optional VX hinge for increased security

Optional security equipment RC 2 for apartment entrance doors

- VX hinge
- 3-point locking with stainless steel lock cover
- Reinforced leaf frame

Optional equipment

- Spyhole
- Wide angle camera with LCD display (figure on page 64)
- Electric strike
- Motor lock

Additional locking at top in the optional RC 2 security version

Protective fitting ES 2 for optional RC 2 security equipment

Additional locking at bottom in the optional RC 2 security version

For a friendly atmosphere: all-glass doors

Glass doors are not only upmarket and chic, they contribute to an open and friendly design for your home and lend each room a particular charm.

Discover the all-glass door that suits you. Available as leaf doors with timber frame or as sliding doors (for more information on sliding door versions, see pages 76 – 77).

How to customise your dream door

Glazing cut-outs

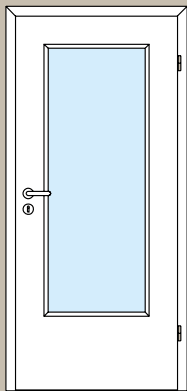

With our selection of glazing cut-outs, you can take your favourite style and make the personalised door of your dreams. You can select the glazing style for your glazing cut-out – you can find all glazing variants on page 69.

Side elements and transom lights

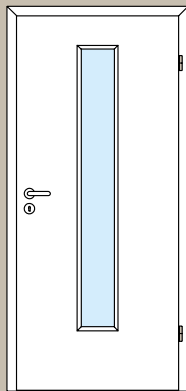

Side elements and transom lights flood your living spaces with light for a special flair. While side elements visually enhance the door sets, transom lights emphasise the room height. Top panels underscore the ceiling-high appearance of the door set.

Concealed hinge Pivota FX 2 60 3D (optional)

Lock

Standard: deadlock, Class I, lock cover in nickel silver

Our panelled versions in detail Georgia – with inlaid profile strip

Our panelled doors emphasise a perfect country house style. Whether with a Duradecor surface, in a lacquered version, or as real wood veneer – each individual door satisfies the demands for a tasteful and comfortable home.

You have a choice of styles with intricately inlaid profile strip, classic surface-mounted profile strip or embossed profile.

During production of the high-quality Georgia door styles, a groove is milled with great care and a profile strip is inlaid in it. This creates a sophisticated door appearance. Georgia is available in all Duradecor*, real wood veneer and lacquer surfaces and decors.

Vermont – with surface-mounted profile strip

The surface-mounted profile strip characterises the classic lines of the Vermont door styles. We provide these styles in all the Duradecor* surface designs.

Carolina – with embossed profile

In the Carolina styles, the profile is embossed directly into the door leaf and then carefully painted. The Carolina series is available with a white lacquer surface.

Our space-saving marvels: sliding doors

Sliding doors open up new possibilities for ideal use of your living space. Hörmann offers sliding door solutions for every living situation. All rebated door styles in BaseLine and DesignLine as well as in GlassLine are available as sliding doors.

With the brush on the door leaf (figure on left) and the inlet seal in the frame (figure on right), Hörmann sliding doors offer optimal protection against odours, noise and draughts – for even more comfort in your own home.

Benefit from impressive performance features: Duradecor

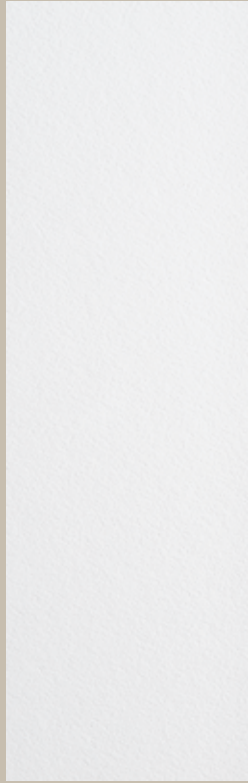

With regard to ease of care and robustness, Duradecor cannot be beaten – it is almost as durable as a kitchen countertop.

- Maximum impact resistance
- Hygienic and low-maintenance
- Strong antistatic and colour-fast properties
- Resistant to heat and abrasion
- Stands up to normal household fluids, pastes, etc.

Duradecor synchronous texture

With the Duradecor synchronous texture surface finish, we have achieved a perfect visual and tactile reproduction of real timber down to the last detail:

- The characteristic wood grain texture is precisely embossed into the door leaf
- The texture matches the printed design exactly
- A perfect reproduction of real timber that's visible and tangible

Duradecor texture

The Duradecor texture surface has a subtle natural timber character:

- A wood grain texture is embossed into the door leaf, making the characteristic wood structure tangible

	•	•	•
	•	•	•

Honeycomb insert

The honeycomb insert retains its shape and has an excellent price-performance ratio.

Tubular chipboard spacers

The door leaf insert consists of individual spacers that are arranged in the best possible layout. This causes the door leaf to be especially sturdy and suitable for heavy wear.

Tubular chipboard plate

The solid plate with horizontal tubes gives door leaves high surface stability. These high-quality internal doors are suitable for even heavier wear.

Solid chipboard

The high-quality solid chipboard door leaves have the highest leaf rigidity and are suitable for especially heavy wear. Doors with glazing cut-outs are available with solid chipboard as standard.

Technical data

Door leaf

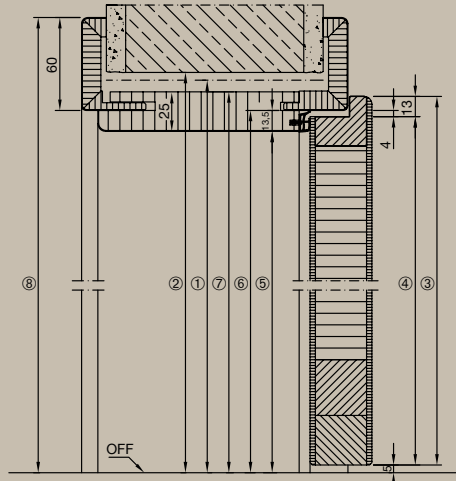

- approx. 40 mm thick (TechnicLine approx. 46 mm thick)
- Frame construction made of solid timber/timber material with additional frame reinforcement, can be shortened by 25 mm at bottom
- For double-leaf doors: with counter rebate*
- Climatic class I (TechnicLine Climatic class III)
- Duty category N to E (according to version)
- Pre-hanged according to DIN 18101
- Suited for timber profile frames or standard frames made of steel

Frame

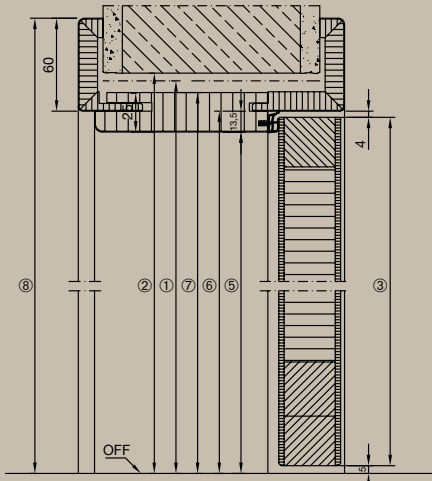

- Rebate cladding 16 × 60 mm, mitred and firmly glued to the jamb lining, 16 × 80 mm on request
- Jamb lining made of 25 mm chipboard, rebate cladding and decorative edge made of 12 MDF boards
- Decorative edge 16 × 60 mm, optionally 16 × 80 mm
- Adjustable for wall thickness – 5 mm / + 15 mm
- Sound-absorbing seal inserted at the factory, mitred
